**COMPLAINT**

Plaintiff Rothschild Patent Imaging LLC (“Plaintiff” or “RPI”) files this original Complaint against Plex, Inc. (“Defendant” or “Plex”) for infringement of United States Patent No. 8,437,797 (“the ‘797 Patent”).

**PARTIES AND JURISDICTION**

1. This is an action for patent infringement under Title 35 of the United States Code. Plaintiff is seeking injunctive relief as well as damages.

2. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331 (Federal Question) and 1338(a) (Patents) because this is a civil action for patent infringement arising under the United States patent statutes.

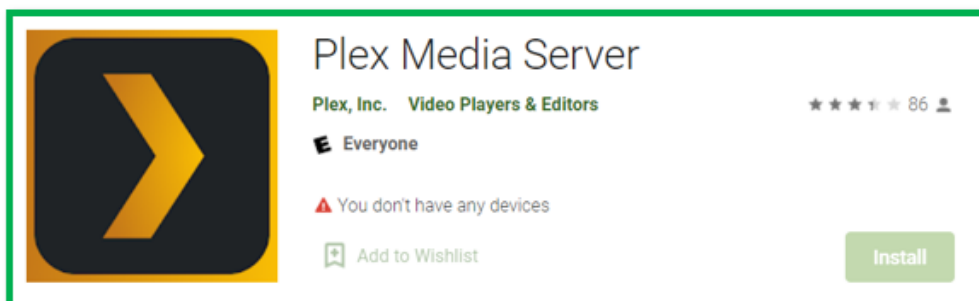

1           11. A copy of the ‘797 Patent, titled “Wireless Image Distribution System and  
2 Method,” is attached hereto as Exhibit A.

3           12. The ‘797 Patent is valid, enforceable, and was duly issued in full  
4 compliance with Title 35 of the United States Code.

5           13. On information and belief, Defendant has infringed and continues to  
6 infringe one or more claims (at least by having its employees, or someone under  
7 Defendant's control, test the accused product), including at least Claim 16 of the ‘797  
8 Patent by making, using, importing, selling, and/or offering for sale network storage  
9 systems including hardware, software and firmware, covered by at least Claim 16 of  
10 the ‘797 Patent.

11           14. On information and belief, Defendant sells, offers to sell, and/or uses  
12 network storage systems and methods including, without limitation, the Plex Media  
13 Server photo, media, and file storage and sharing system, the Plex App, and any similar  
14 products (“Product”), which infringe at least Claim 16 of the ‘797 Patent.

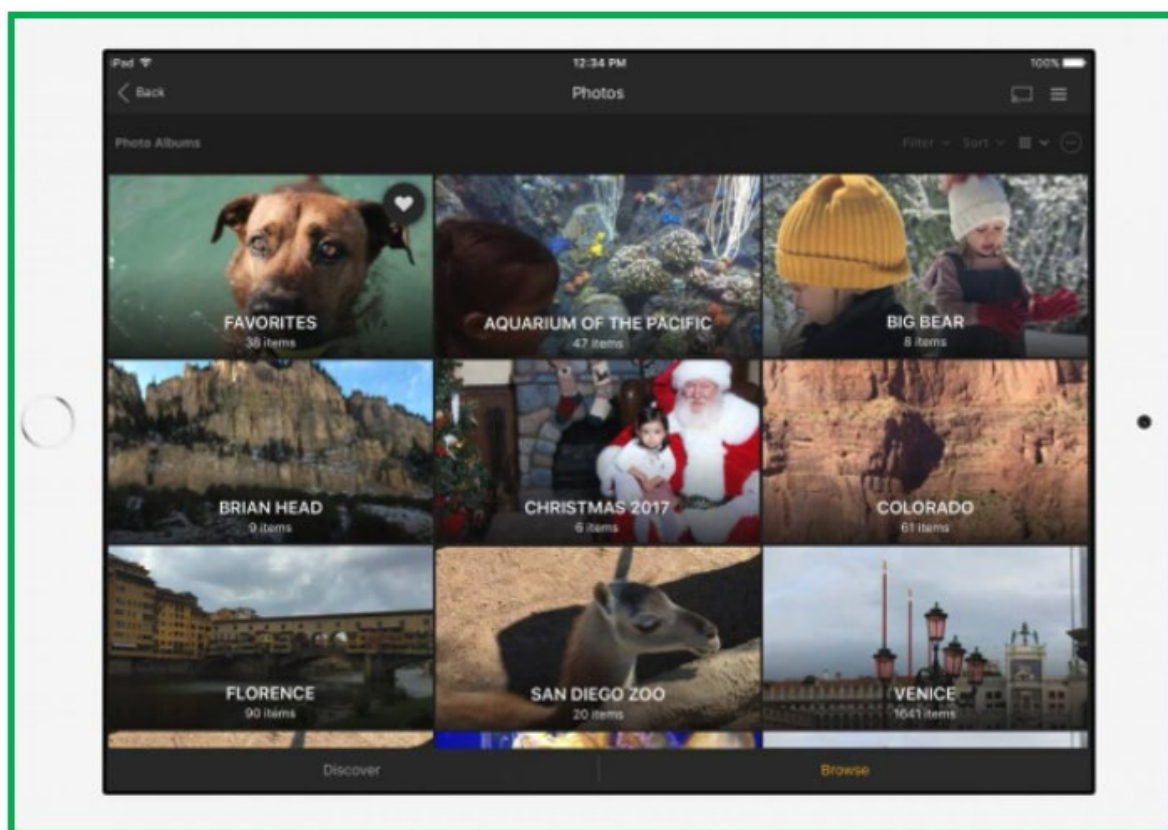

15           15. The Product uses an image capturing device to perform a method. The  
16 Product receives and filters photographic images from cameras. The Product also  
17 shares the images according to certain conditions. Certain aspects of this element are  
18 illustrated in the screenshots below, and/or the screenshots provided in connection with

The Product's app can access captured images (e.g., images stored on a smartphone) and allow a user to transfer the images to other users. Certain aspects of this element are illustrated in the screenshots below, and/or the screenshots provided in connection with other elements discussed herein.

18. The Product practices transmitting, via a wireless transmitter and to a second image capturing device, the filtered plurality of photographic images.
